

**National Interagency Coordination Center
Incident Management Situation Report
Monday, May 31, 2021– 0730 MDT
National Preparedness Level 2**

National Fire Activity (May 28, 2021 – May 30,2021):

Initial attack activity:	Light (388 fires)
New large incidents:	6
Large fires contained:	5
Uncontained large fires: ***	13
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	2

Nationally, there are 10 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 3)

New fires: 32
New large incidents: 1
Uncontained large fires: 7
Type 2 IMTs committed: 1

Sycamore Canyon, Papago Agency, BIA. IMT2 (SW Team 4). Fifteen miles southeast of Sells, AZ. Grass and brush. Minimal fire behavior with backing, creeping and smoldering. Structures threatened.

* **Courthouse**, Central District, Arizona DOF. Thirteen miles southwest of Tonopah, AZ. Grass and chapparal. Active fire behavior with group torching, flanking and backing.

Warren, Coronado NF, USFS. Nine miles south of Portal, AZ. Grass and brush. Minimal fire behavior with smoldering.

McDonald Tank, Fort Apache Agency, BIA. Twenty-five miles southeast of Whiteriver, AZ. Timber, brush and grass. Minimal fire behavior with creeping, smoldering and single tree torching. Structures threatened. Area and road closures in effect. Reduction in acreage due to more accurate mapping.

Dog, Guadalupe Mountains NP, NPS. Thirty-four miles southwest of Whites City, NM. Timber and grass. Minimal fire behavior with smoldering. Structures threatened. Area and trail closures in effect.

Eicks, Socorro District, New Mexico DOF. Nine miles northeast of Cloverdale, NM. Grass and brush. No new information.

Boggy Creek, Apache-Sitgreaves NF, USFS. Fifteen miles southwest of Alpine, AZ. Timber and grass. No new information.

Predictive Services Discussion: Upper-level ridging will continue to build over the West, especially the West Coast with well above average temperatures and low RH expected again. Temperatures will be 15-35°F above normal from central California into the Pacific Northwest with the most anomalously warm temperatures from the Central Valley to the Coast Ranges of northern California and southwest Oregon. Isolated to scattered drier thunderstorms are likely over the higher terrain in portions of Utah and northern Arizona. Mostly wet thunderstorms will likely continue over the eastern half of New Mexico and in portions of the Colorado Rockies.

NFDRS Pocket Cards

Weather – Fire Behavior Category

The National Fire Danger Rating System (NFDRS) PocketCard is a tool for field personnel to locally track fire potential throughout the season. It is based on historical weather and fire occurrence for a localized area. The PocketCard displays a general assessment of the fire potential and identifies combinations of local weather and fuel conditions that might contribute to severe fire behavior.

The PocketCard provides:

- A general indicator of the potential fire danger for a given rating or protection area.
- A graph showing the trend and status of the current year's fire season.
- A comparison of current year conditions to historical worst and average conditions.
- Fire danger values related to past large or problem fires.
- Critical local thresholds for temperature, humidity, wind speed, and fuel moistures associated with large or notable fires.

Discuss the following ways to use the PocketCard:

- Use it primarily before fires occur or before arriving at a fire. It is also useful during initial fire size-up, initial attack, and extended attack.
- Use it to learn critical local area thresholds that predict the potential for extreme fire behavior. Be aware that these critical thresholds can occur earlier or later in the season.
- Use it to compare current and predicted local fire danger to historical local fire danger for enhanced situation awareness.
- Use it to track daily fire danger indices that gauge the potential for weather and fuels to support extreme fire behavior, as well as affect the difficulty of control.
- Use it to supplement local experience.
- Use it as a point of reference for firefighters not familiar with the area represented by the card.
- When you receive a fire assignment outside your local area, visit the National PocketCard website, <https://famit.nwcg.gov/applications/WIMS/PocketCards>, where PocketCards are filed by geographic area.
- Put it in the pocket of all your firefighters and keep one in each fire vehicle.
- Post it in dispatch. Use them in briefings. Provide them to incoming crews.
- **Do not use the PocketCard for site-specific fire behavior predictions, fireline actions, or without an interpretive briefing.**
- Review definitions and implications of Energy Release Component (ERC) and Burning Index (BI) values.
